Press2Go Editor

Texteditor for QuarkXPress

Press2Go Editor permits a user working within QuarkXPress to edit a story in a convenient window rather than edit the story on the finished page. The copy can be viewed as monospace, wrapped copy (no line endings); monospace with accurate line endings; and WYSIWYG with accurate line endings. And the on-screen text representation can be modified to reflect any font and point size for ease of readability
