PS Utilities

PostScript troubleshooting and printing tools

The Quark PS Utilities XTension adds PostScript troubleshooting and printing options to QuarkXPress 3.3. The XTension consists of six PostScript utilities:

- Quark PostScript ErrorHandler — Track down printing problems.
- PDF/PPD Statistics — Gather information about your PDFs and PPDs.
- PostScript Font Usage — Get information about the fonts used in a document.
- PostScript Screening — Choose which screening parameters QuarkXPress controls and which your printer controls during printing.
- EPS Bleed — Add a bleed to your QuarkXPress “Save Page as EPS” files.
- Overprint EPS Black — Overprint 100% black objects from EPS files.
- Full Resolution TIFF Output — Print TIFFs at full printer resolution.
