XDocument

"Remembers" the last 25 QuarkXPress documents

The XDocument XTensions(TM) software for QuarkXPress version 4.0 is a tool that keeps track of your QuarkXPress(TM) document files. It re-opens automatically any document that was left opened the last time QuarkXPress was closed and - thanks to the document "New" files sub-menu - provides a direct access to your last 25 document files in use.
