

ex Translation Filter and Trados Studio 2014 and 2015

If you are using **ex TranslationFilter** and **Trados Studio 2014 or 2015** in your translation workflow, please note the following:

- you will need at least **ex TranslationFilter Version 1.8**.
- To save the translation in Trados Studio choose "**Save target Text under**" to save as XLIFF format. In the dialog you have to choose "**Unicode (UTF8)**" for coding:
