

inp02

BASIC + AUTOMATION MODULE

WHAT IS INPO2 BASIC?

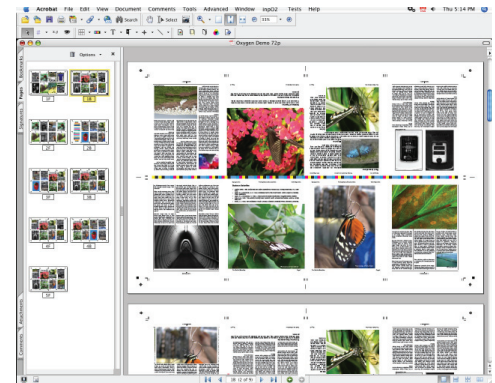

inp02 is a modular imposition solution for Adobe Acrobat. Although modules may be purchased separately, Dynagram offers cost-effective bundles. The first bundle is called **inp02 Basic** and it includes the Wizard and the Layout Editor:

WIZARD

Simple 6-step wizard interface to impose single-file documents directly within Adobe Acrobat. inp02 Wizard supports Perfect Bound, Saddle-Stitch, Step & Repeat and N-Up bindings.

LAYOUT EDITOR

inp02 Layout Editor Module allows for customization and fine-tuning options through the inp02 light-table interface. The additional features that come with this module include Sheet Size Definition, Automatic Creep Control, Custom Editing on Light-Table, Create Layout from Template, Custom Layout Creation, Presets (Libraries for Common Settings) and Layout Checkpoints.

inp02 Light-Table Interface

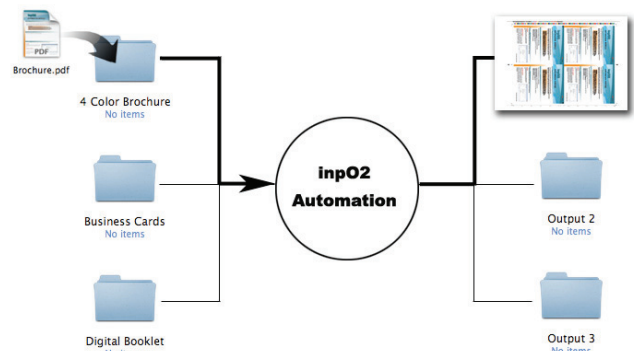

AUTOMATION ADVANTAGE

Looking for a way to reduce costs and mistakes through process automation? Add the Automation Module to the Basic Package!

The new **inp02 Automation Module** offers hot folders-based imposition for automated workflow. Any layout produced with the Wizard can be saved as a layout profile and assigned to Hot Folders along with specific output profiles for drag and drop production.

The inp02 Automation features include:

- Set-up your presets using the user-friendly Wizard interface
- Unlimited number of hot folders
- Dynamic templates adjust to the page number and trim size
- Available for step & repeat and folded work
- Reduces turn-around time
- Reduces errors by automating common imposition tasks
- inp02 users can monitor or record automation activities

For more information on inp02, individual modules, packages available or to download a free 15 day trial version, visit our web site at www.dynagram.com.
