

AliasPro

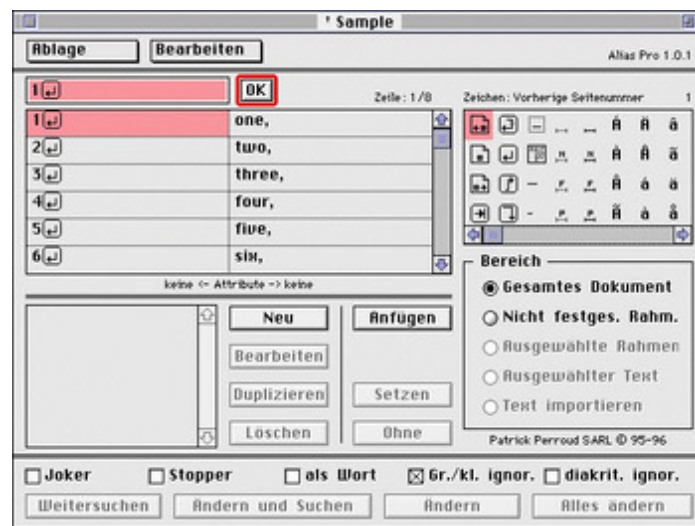

Voluminously extended "search and replace" function

With the XTension AliasPro you can establish voluminous search&replace routines, which are to re-used and saved countless times, including all printable fonts for mac and pc and QuarkXPress special characters (tabulator, return and so on) and WildCards as well. Even encoded ASCII can be copied from every hardware platform. You can search texts through their formatting in a text attribute dialog.

The preferences can be saved and used for searching in as many XPress documents as you want.

Possible usage:

- Controlling of punctuation
- Typographic Rules
- Definition of text import filters
- Standardizing of abbreviations
- Scheduling of identical words
- und many other.
