

# BatchOutput

## Automate printing and exporting from Adobe InDesign

BatchOutput automatically prints and exports InDesign documents to various formats. Just select the documents you need to output, adjust the settings, and BatchOutput will do the rest for you.

BatchOutput is not just a plug-in - it's a workflow solution that integrates fully with the Finder, interacts with Acrobat Pro preflight engine, provides digital delivery capabilities, and delivers the power of a fully integrated InDesign plug-in combined with the versatility of an independent application.

## Key Features

- Print and export hundreds of documents automatically
- Automate output to printer, PDF, PostScript, EPS, JPEG, TIFF, PNG, GIF, Flash and INX
- Output as single pages
- Output InDesign books (.indb files)
- Update modified links automatically
- Preflight final PDF automatically with Acrobat droplets
- Output documents invisibly and suppress warnings
- Assign complex variable file names
- Send output files to FTP and locally
