Easy drag & drop ads in an XPress document

Just drag and drop ads (EPS-files) on your QuarkXPress layouts. This Xtension is especially customized for the Vi@va system, regarding folder structures and parameter files.

The XTension lists all ads in a palette that have been saved into a pre-defined local folder or in the network. In the palette you find detailed information about the ad number, the number of columns and height of the ad also. The ads can now be directly dragged on to the layout. Elements which are placed on the document are marked in the palette. Subsequent replacements or cancellations of ads may be done. Cancelled ads are blocked automatically and will not be placed any more. Thus it is possible to get an easy imposition.

| Name | Breite | Höhe |
|--------------------------|--------|------------|
| 1 x100.EPS 12.29 | 13 | 100.542 mm |
| 1 x150.EPS 12.29 | 13 | 150.636 mm |
| 1x100-XP.EPS | 13 | 99.836 mm |
| 1x1001234567890123456.EP | 13 | 485.775 mm |
| 1x50 12.29 | 13 | 50.094 mm |
| 2 x150.EPS 12.29 | 26 | 150.636 mm |
| 2 x485.EPS 12.29 | 26 | 485.775 mm |
| 2 x50.EPS 12.29 | 26 | 50.8 mm |
| 2x491.EPS | 26 | 491.067 mm |
| 3 x200.EPS 12.29 | 40 | 200.731 mm |
| 4 x250.EPS 12.29 | 54 | 250.825 mm |
| 7 x120.EPS 12.29 | 81 | 120.65 mm |
