

ex AssetReport

For creating a royalty list for QuarkXPress documents (with QPS)

With ex AssetReport you can create a royalty list for editors and photographers who contributed articles or pictures to a XPress document. QPS has to be in use, because XPress-documents and articles will be administrated in QPS. A picture database (QCM) has also to be in use combined with an external database containing the information about the external Editors. The Option "Create Report" will create a list of all articles and pictures in the current document. With a search function it is possible to get details about an author or a photographer to each asset.

Please select the QPS headerfields containing the values for Authorinitial, Authorname, Publicationdate, Issue No. and Section:

Authorinitial:

Authorname:

Publicationdate:

Issue No.:

Section:

URL:
