

ex PreviewCreator

Creating of picturefiles of your QuarkXPress documents

The XTension ex PreviewCreator allows generating of previews from your XPress documents alternatively in JPEG, PNG, TIFF, PICT, GIF or BMP. Previews can be created with shortcuts and saved into a predefined folder.

With the ex PreviewCreator previews of a page in the workflow can be created automatically in collaboration with [ex XML Exporter](#) and [ex AutoJob XTension](#).

This XTension is part of the exportsolution "[Print2iPad](#)" for the automated and structured export of your printcontent to digital output channels like iPad, etc.
