

ex Utility QDMS

Standalone Windows application which conducts maintenance for the QDMS based wire package

ex Utility is a standalone Windows application which conducts maintenance for the QDMS based wire package.

Functions performed:

- delete all wire records from the database
- remove all delete candidates (to clean up the database)
- reorganize the database (deletes records with expired deletion dates)
- check for disabled storage devices in the connected file servers and try to re-enable them
- Move asset attribute values from one attribute to another
