

Special details

This is where to define special XML tags, consisting of constants, the clear article ID, automatic node numbers (to go back/forth within articles or pages in the ePaper) and customer specific tags.

The image shows a dialog box titled "XML assignments" with two main sections: "XML Target" and "Layout Source".

XML Target section:

- Type: Element
- Name: (empty text field)
- Occurrence: 1
- Format: (empty text field) CDATA Section

Layout Source section:

- Type: Other
- Name: (empty text field)
- Sources of same type: (empty text field)
- Format: (empty text field)

A dropdown menu is open for the "Type" field in the "Layout Source" section, showing the following options:

- ✓ Constant
- UID
- MediafinPubTime
- MediafinEdition
- NodeCount

At the bottom of the dialog are "Cancel" and "OK" buttons.
