Fontincluder Pro Server

Serverbased solution for embedded fonts in PostScript- and EPS-files

FontIncluder Pro Server offers the same range of functionality as FontIncluder2, supplemented by an intelligent and flexible, hotfolder based automation mechanism. The tool is extremely valuable in advertisement agencies, graphic design and prepress companies, having to process PostScript, EPS or DCS files constantly and seaking for a high degree of automation.

FontIncluder Pro Server monitors a hotfolder permanently and turns on automatically when missing fonts have to be embedded.

Shortoverview:
