

FormsX

extends QuarkXPress functions when it comes to creating forms

The FormsX extends QuarkXPress functions when it comes to creating forms, coupons, certificates, checks etc., fast and easy. Create boxes with different corners, automatically redraw boxes as they are scaled, create three or two-sided frames for boxes. User definable dot shape, angle and line frequency. Scan frame borders for conversion to PostScript font. Use fonts to create borders around objects. Select columns of tabs for editing. Automatic vertical and horizontal rules in boxes.
