# Fraemz PS XT

404 ready to use PostScript Frames for QuarkXPress

Fraemz PS XT is a collection of 404 decorative borders which install directly into QuarkXPress becoming an integral part of the program. Once installed you can modify the size and shape of the border to your requirements.

Fraemz PS XT allows you to place dynamically sized border graphics that are custom-tailored to the size and design of elements in their page layout. The libraries are resident within QuarkXPress and can be easily accessed from the document you are creating, using only a few clicks of the mouse.

Use Fraemz PS XT to enhance your newspapers, yellow pages, newsletters, ads and any other documents you produce with QuarkXPress.

Fraemz PS XT offers:

- 404 High-resolution PostScript borders
- CMYK color compatibility for process separations
- high-resolution PostScript output
- Intuitive and efficient user interface
- Precise selection of border parameters using scroll bars or numeric fields
- Selectable drop shadow effect
- Ability to resize corner and side elements of the border independently
- Ability to place corner or side elements of the border independently
