# Guide Master

exact control on your guides in QuarkXPress

The XTension offers you control over your standard XPress page guides, letting you control the color of the standard page guides and also provides three other custom-colored page guides so you can see the layout of your guides at a glance. The Guide Master dialog enables you to view all of either the horizontal or vertical guides on any given page or spread. Any guide can be locked in place and/or made undeletable with a click of the mouse. You can even print out a list of the guides located on the pages of your document. Additionally, an entire spread of guides may be saved to a data file for later use. -> ex Grids&Guides
