

I Shadow

Create your own soft shadow effects without leaving QuarkXPress

The I Shadow XTension lets you create real soft shadow effects on text, graphics or graphic boxes without ever leaving QuarkXPress. There's no need to launch an image-editing program to create shadows when I Shadow can do it quickly and easily. The soft shadows are made of TIFFs, and the user may choose the resolution of the shadow. Shadows can even overlap and be burned into underlying CMYK and RGB TIFFs on the document. I Shadow can also create simple drop and three-dimensional shadows for text and graphic boxes to cover all of the user's shadowing needs.
