

Imposer

Imposing directly in QuarkXPress

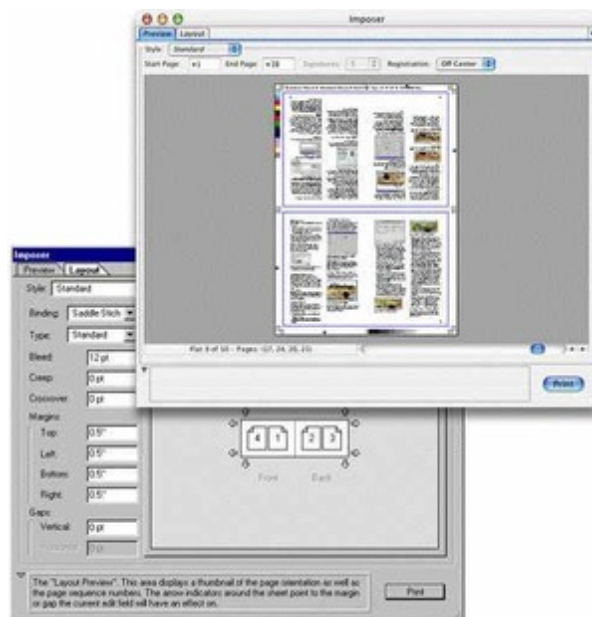

Impose pages from a single QuarkXPress project into 2-up or 4-up flats. Unlike other solutions, Imposer does not rearrange or shuffle pages in a document. Reordering is handled in the print stream for quicker, more reliable results. Imposer gives you full control over creep, bleed, and crossover traps. Whether your production piece is a brochure or a book, Imposer offers a seamless, easy-to-use solution for QuarkXPress users.

You can place custom marks when you use Imposer in conjunction with the [MarkIt XTension](#).

In comparison to [Imposer Pro](#) you can only impose max. 4 flats instead of 8 with Imposer Pro

Features:

- Choose 2-up or 4-up flats and Standard, Work and Turn, or Work and Tumble imposition types
- Select saddle-stitch, perfect-bound, or single-sheet binding
- Flip and move pages within a printer flat
- Start an imposition at any page in the document
- Specify the number of pages in a signature
- Control plate margins, horizontal and vertical gaps, bleeds, crossover trapping, and creep
- Access registration styles created using the Quark ALAP MarkIt 2.x XTensions software
- Save frequently used settings as reusable imposition styles
- Export and share imposition styles
- Preview any printer flat and control color depth of previews
- Display page boundaries, bleeds, and page numbers in previews as necessary
- Print with standard QuarkXPress controls
