

InPreflight

Complete document preparation solution for InDesign

InPreflight is a powerful all-in-one solution to check InDesign documents and prepare them for final output and shipping

Package multiple InDesign jobs

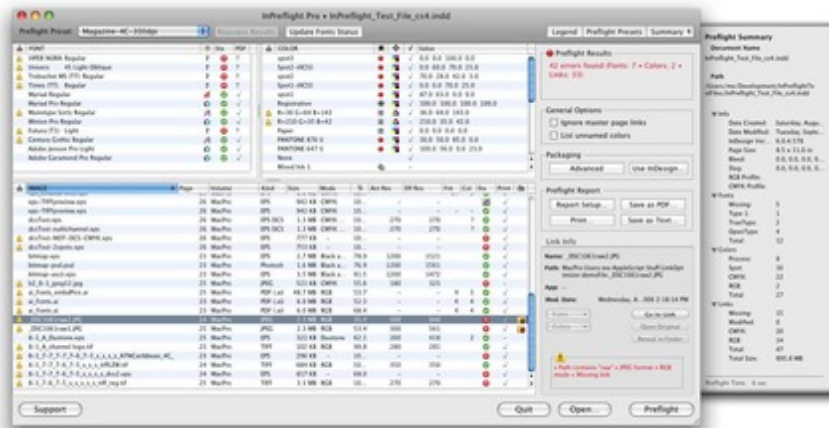

InPreflight Pro is the only program that can preflight and package multiple jobs. Among other abilities, it can collect all files into one folder, eliminating the need to collect the same links multiple times for each design. The savings can result in gigabytes of space and hours of production time.

Preflight InDesign documents

InPreflight quickly checks all document elements and lets you instantly locate potential problems according to user-defined preflight presets. In one window, InPreflight shows detailed info on all your fonts, colors and links so you don't need to switch between several windows and palettes.

Print and save graphic PDF reports

InPreflight lets you print graphic preflight reports and save them as PDF, providing an easy way to analyze, archive and send reports to service providers.
