KalimatX

create arabic text for non-arabic applikations on Mac

Top designers are well acquainted with Kalimat; Layout Ltd's top-selling Arabic-based software solution, which allows you to use Arabic with all Macintosh illustration and photo retouching programs, such as Adobe Photoshop, Adobe Illustrator, Macromedia Flash, CorelDraw, or any other image-editing program on the Macintosh platform. This Arabic utility has become a hit, installed on the machine of almost every Macintosh designer in the region. KalimatX remains the top-selling Arabic desktop publishing software with more than 8000 installations in the Arab world alone.

If you need to insert Arabic into your design, KalimatX is the best Arabic software solution for you. KalimatX makes it simple to add the Arabic language to your designs, including advertisements, brochures, catalogs and more. With this Arabic software, the end result is a creation of stunning effects, with no need for an Arabic operating system or Arabic language kit.

Graphic Designers simply type and edit text in KalimatX and export it to non-Arabic applications. KalimatX is the perfect Arabic desktop publishing tool for creating superlative and professional publications that include the Arabic language. With 22 beautifully designed Arabic fonts, designers have complete control over their creations.
KalimatX opens up self-publishing opportunities in Arabic for the novice as well, including students, freelancers, and home-based professionals.

KalimatX is designed for use under Mac OS X.
