MarkzTools for InDesign

MarkzTools allows to open higher version InDesign layouts in lower versions of the application.

MarkzTools for InDesign is a CS6, CS5.5 or CS5 PlugIn for Mac that allows you to open higher version InDesign layouts in lower versions of the application. For instance, someone using InDesign CS5.5 can now open an InDesign CC 2014 document. No need for IDML or to bother a customer to down-save. Just MarkzTools, "Open Higher InDesign Version" and it opens!

MarkzTools is available as 1-Year Subscription.
