

# PantoneColor Drive

## Central color palettes setting

Real, consistent and foreseeable colors are all over very important: at printing and at digital sector. Designer often work with different programs, which response the same color often different. ColorDrive solves this problem by creating central color palettes, which can be imported to the different programs where they will be responded uniform. ColorDrive contains all present available Pantone colors, beyond that, you can define your own colors. For printing on colorprinters, ColorDrive gives you individual CMYK tables for more than 70 colorprinters.
