- Edit PDF text in a familiar, efficient page layout program
- Eliminate time spent re-creating content

All elements of the PDF-file will be converted with just one mouseclick. No longer re-create documents from scratch or convert PDF just one page at a time. PDF2DTP gives you a big head-start in converting your PDF to InDesign or QuarkXPress. You just have to control the colors and stylesheets etc.

NOTE:

File conversion is performed to the best standard achievable by current technology but will not be 100%. Use of this product is likely to require some manual processing to achieve the desired result.

NOTE: PDF2DTP does not convert Tables to True tables, threaded text boxes, or True Runaround text. While colors are converted, the colorspace of the PDF may not match the InDesign or QuarkXPress environment and, while color names may match the actual color in the document, may slightly vary.
