

# pdfaPilot

## The direct way to PDF/A

The pdfaPilot pdfaPilot plug-in for Adobe Acrobat is an especially easy-to-use, quick and secure tool for the long-term archiving of PDF documents.

Designed for archive users, public authorities and enterprises, pdfaPilot enables the verification of PDF/A documents according to ISO 19005-1. Non-compliant PDF files can be saved as valid PDF/A documents with the touch of a button to the PDF/A standard.

### Benefits:

- Extensive analysis and validation of PDF files according to PDF/A (ISO standard 19005-1:2005) at the touch of a button
- Verifies contents of a PDF file with regard to possible correction and conversion to PDF/A
- Corrects and converts existing PDF files to PDF/A within a few seconds
- Clear and reliable information on PDF/A conformity
- Easily understandable instructions and detailed explanations
- Powerful basic tool for effective PDF/A archiving strategies
- Optimal quality assurance during PDF/A archiving for individual users
- Can be used immediately, no training necessary due to clear user interface
- Supports archiving accessible PDF documents according to PDF/A-1a
- Ensures complete fidelity to layout of the PDF files to be archived
- Same validation technology as the Preflight function in Adobe Acrobat 9 Professional
