

pdfToolbox

The indispensable addition to Adobe® Acrobat® for any Print Professional

pdfToolbox 3 is a must-have tool for anyone involved in professional print production. Its visual inspection and automatic correction functionality allows you to quickly prepare files for their intended output.

Based on Adobe Acrobat's preflight technology callas pdfToolbox' automatic correction capabilities are really easy to operate. Simply select your production process and pdfToolbox will make the document compliant. The product also allows for comprehensive color conversion and advanced font embedding.

With pdfToolbox you can rest assured that you will be able to fix nearly all errors of your incoming files, faster than anyone else on the block.

Benefits

- Correcting PDFs is no longer in the hands of a few experts
- Full support of PDF/X standards
- Intuitive full text search helps to identify the best correction profile
- Correction profiles can easily be changed and tested
- Affordable and easy to use, enabling every user to create production-friendly PDFs
- Usable in every PDF based CTP workflow environment for interactive changes and corrections
- No more customer complaints about unsatisfactory printing results due to bad PDFs
- Analyzes and corrects more than 60 different production problems in PDF files
- Avoids incorrect characters and embeds missing fonts
- Professional color management for everybody – complete the learning curve in less than 5 minutes
- Converts RGB from Office PDFs into printable CMYK
- Enables repurposing for online publishing by converting CMYK and Spot colors to RGB
- Put black graphics or text and grayscale images on the black plate
- Avoids unwanted CMYK conversions
- Allows to map spot colors or convert – completely or selectively – to CMYK
- Aligns color for different production processes through DeviceLink profiles
- Converts any color PDF to B/W for output on monochrome printers
