

Portfolio

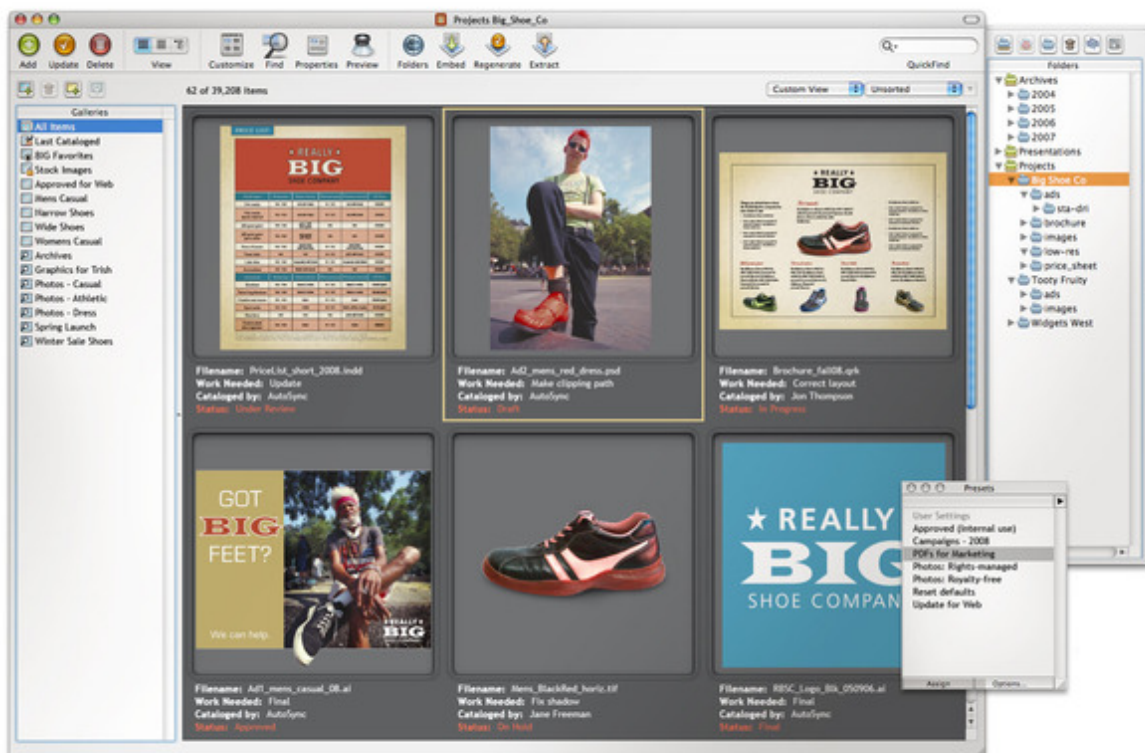

Portfolio automates and simplifies the task of organizing and accessing all your digital files -- photos, documents, presentations, and more.

Why spend hours out of your week organizing, archiving, tracking and sharing your creative digital assets, when Portfolio 8.5 can do it for you.

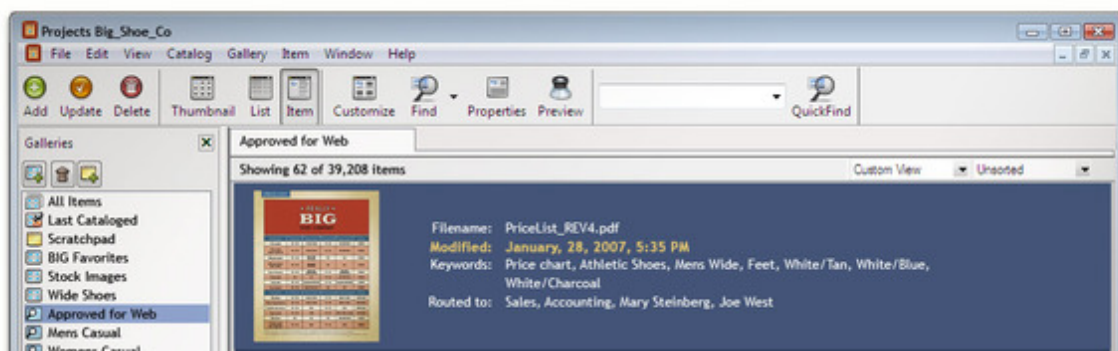

Portfolio 8.5 is powerful digital asset management software, but think of it as your personal assistant. It allows you to visually organize, sort and preview your complete library of digital assets—both online and offline. Its built-in automated features allow you to quickly embed metadata into, archive, and share your assets with partners, clients and vendors.

Portfolio overview:

- Visually organize, find & share your files
- Automatically catalog your files
- Drag & Drop files into applications
- Support for Raw camera formats

Portfolio Mac

Compatibility Overview

Portfolio v8.5 is backwards compatible with Portfolio v6 - v8 catalogs. Users of earlier versions will need to update their catalogs to Portfolio v6 or v7 before opening them in Portfolio v8.5. Portfolio v7.0.4 or later NetPublish templates will also work directly in Portfolio v8.5. Portfolio v7 custom views and borders will be honored in updated catalogs.
