

PUB2ID

Converting from MS Publisher to Adobe InDesign documents

PUB2ID (Microsoft Publisher to Adobe InDesign) is a plug-in for Adobe InDesign CS 6. It provides a quick, easy and affordable method to migrate all your Microsoft Publisher content (version 2002 - 2010) into new Adobe InDesign CS 6 documents. The conversion is enabled with a single click using the InDesign File->Open menu.

PUB2ID translates the intricate details of the content within the Microsoft Publisher document and instantly re-creates it within InDesign. Items converted from Publisher include: page size, positioning, color models, fonts and styles, text attributes and tables, layers, word wrap, linked text boxes as well as automatic extraction of images embedded in the Publisher file.

The PUB2ID (Microsoft Publisher to Adobe InDesign) document conversion technology will save countless hours of scanning, re-keying and formatting. This product converts and transforms files created with Microsoft Publisher into an Adobe InDesign file on either Macintosh or Windows platforms.

Notice:

File conversion is performed to the best standard achievable by current technology but will not be 100%. Use of this product is likely to require some manual processing to achieve the desired result.
