The freedom to work the way you want

QPS® provides tools that let teams of writers, designers, editors, and other contributors to creative and editorial workflows integrate their tasks and produce content for publication across mixed media.

QPS is extremely flexible concerning the in use Desktop Publishing Software, because it works with QuarkXPress® with QuarkCopyDesk® and Adobe® InDesign® with InCopy® in one system!

QPS palette with projects, layouts, articles and components. There are Quark documents as well as Adobe documents integrated
