

# QXEffects

## Professional visual effects

Extensis QXEffects 3.0 helps you quickly create professional looking visual effects directly in QuarkXPress with less time and effort. No muss, no fuss. Construct high-quality shadows, bevels, glows, or embosses with just a few clicks, without ever leaving QuarkXPress. Simple, intuitive controls allow you to interactively preview and select each effect's shape, shadow angle, blur, color, contrast, and more. Merge the effect seamlessly with background TIFFs. No more switching among applications, recreating and importing files. With just a few clicks, QX-Effects untangles the path to stunning effects, saving you time.
