

Save/Get Keys

Assign defined text strings to keyboard commands

Save/Get Keys allows the user to define regularly used text strings and assign them to keyboard shortcuts.

- Save/Get Keys can include Plain Text, Style Sheets, Character and Paragraph attributes
- Save/Get Keys can be defined via a menu option or a button on the floating palette
- Once defined, Save/Get Keys can be edited (including Style tag information) via the floating palette
- Multiple KeySets can be created, allowing grouping of Save/Get Keys and duplicate use of keyboard shortcuts.
