

Starburst

creating "stars" in QuarkXPress

Starburst creates "stars". The form can be predefined. The "stars" (picture boxes) for example can be used for ads.

The image shows a dialog box for the Starburst tool. It contains several settings:

- Point Spacing:** A group box with five radio buttons: Very Fine, Fine, Medium, Coarse, and Very Coarse.
- Point Depth:** A text field containing the value "50" followed by a percentage sign (%).
- Eccentricity:** A group box with two text fields: "Horizontal: 0 %" and "Vertical: 0 %".
- Randomness:** A group box with four radio buttons: Regular, Slightly Random, Medium Random, and Very Random.
- Buttons:** "Cancel" and "OK" buttons are located at the bottom right.
