

Features

With all the power and control of a server solution yet none of the IT hassles, Universal Type Server Lite font management software allows you to store all fonts in one clean, centralized library. Plus, it serves up an impressive menu of features to control and share your fonts across the team.

Centrally Share and Access Fonts

- Easily share and organize fonts across your team from a central and secure location
- Live font management system distributes changes to users' desktops in real-time—without interruptions
- Fonts and font metadata live on the server to ensure font usage consistency across the team
- Easily manage your font libraries, users and permissions from one location
- **NEW** Run font license reports to identify if you have enough licenses and track font access by users

Eliminate Font Conflicts

- Create a conflict-free workflow with a single font database
- **ENHANCED** Auto-activate fonts in Adobe InDesign® and Illustrator® CS2, CS3 and CS4 and QuarkXPress® 7 and 8 documents (Mac and Windows)
- Eliminate font substitutions-- activate the exact font used in a document, utilizing Font Sense™ font identification mechanism
- Decide which fonts are available to whom
- **ENHANCED** Check fonts for corruption and repair before adding them to the font server
- Prevent rogue or unlicensed fonts from entering your workflow

Great Desktop Usability

- Modern and intuitive user interface
- Work uninterrupted whether online or offline
- Professional auto activation with Font Sense® exact font matching technology
- **NEW** Outstanding font and glyph previews to easily compare fonts side-by-side
- **NEW** Floating font previews that “tear-off” and float on top of any application to easily compare fonts in your working documents
- **NEW** Encoding-aware font previews shows all native characters in a particular type face
- **NEW** Glyph View shows you the characters and glyph details within a selected type face
- **NEW** Create print sample pages of any previewed font
- **NEW** Streamlined client access with “remember me” password functionality
- **ENHANCED** Precise font auto-activation in Adobe InDesign® and Illustrator® CS2, CS3 and CS4 and QuarkXPress® 7 and 8 documents (Mac and Windows)
- Save finds that automatically update when new fonts match the specific criteria, similar to smart playlists in iTunes
- Runs as a background application for hands-off automatic font activation

Easy to Set-Up and Maintain

- Simple set up to get you up and running fast
 - Utilizes industry standard applications that fit into any IT environment
 - Web-based interface to administer the server remotely from anywhere at anytime
 - No-hassle, built-in backups automatically protect your fonts and settings
-
