

System Requirements

Server

Macintosh

- Mac OS X v10.4.11, 10.5, Mac OS X Server 10.4, or 10.5
- PowerPC G5 or Intel processor***
- 1 GB available RAM
- 250 MB of hard disk space + space for fonts
- Safari 2.0 or Firefox 2.0 or higher*
- Adobe Flash Player 10 or higher*

Windows

- Windows 2000 Server SP4, XP Professional SP2** (32-bit version only), Server 2003 SP2, Server 2008 (32 or 64-bit version)
- P4 or faster processor***
- 1 GB available RAM
- 250 MB of hard disk space + space for fonts
- Internet Explorer 7 or Firefox 2.0 or higher*
- Adobe Flash Player 10 or higher*
- Adobe Reader 7 to read PDF documentation*
- Microsoft .NET 3.5 or higher
- sc.exe is required for Windows 2000 Server installations

Client

Macintosh

- Mac OS X v10.4.11 or 10.5.6 or higher
- PowerPC G5, Intel or faster CPU
- 150 MB of hard disk space + space for fonts
- 256 MB available RAM
- Safari 2.0 or Firefox 2.0 or higher

Windows

- Windows XP Professional SP3 (32-bit version only) or Vista SP1 (32 or 64-bit versions)
- P4 or faster processor
- 256 MB available RAM
- 150 MB of hard disk space + space for fonts
- Internet Explorer 7 or Firefox 2.0 or higher
- Adobe Reader 7 or higher to view PDF documentation
- Microsoft .NET 3.5 or higher

* Required on the machine that is used to administer the server through the web interface. May be administered remotely.

** Windows XP Professional is limited to 10 user connections. If you require more server connections, use a server-specific operating system. For more information, see the following Microsoft Knowledge Base entry: support.microsoft.com/kb/314882.

***While PowerPC (Mac) and Pentium 4 (Win) processors are supported, it is not recommended for installations serving in excess of 10 clients. Therefore, for customers deploying Universal Type Server Professional, a faster Intel CPU is recommended for both Mac and Windows installations. For optimal performance, choose a processor capable of supporting Java 6. See

the following sites for more information. Java SE 6 release notes and supported configurations: java.sun.com/javase/6/webnotes/install/system-configurations.html Java SE 6 is available on 64-bit, Intel-based Macs only: support.apple.com/kb/HT2733

Things You Should Know

Set-up

- Universal Type Server 2 Lite supports a maximum of 10 client connections (10 clients included)
- Enter one license code for everything (server and clients) in one location at the server
- Assign roles for your most common type of job responsibilities
- Easy set-up for fonts and users

Server

- Requires minimal IT support to install and maintain
- You're protected with built-in automated back-up and restore
- Web-based control of users, fonts and servers from anywhere at anytime
- Support for Mac and Windows servers

Client & enduser benefit

- Best in-class font previews in a modern and intuitive user interface
- Support for both Mac and Windows users
- Font auto-activation support for: Adobe Illustrator and InDesign CS2/CS3/CS4/CS5, QuarkXPress 7 & 8 (Mac and Windows clients)
- Auto-activation works even when client is not running
- Built on SQL Lite database back end for fast performance
- Works uninterrupted whether connected to the server or not
- Incorporates animation technology for fast scrolling, previewing and activation
- Includes a comprehensive Quick Reference Guide to help end-users get up to speed fast

Remark

Universal Type Server 2 Lite does not include a Annual Service Agreement (ASA). An ASA cannot be added to the Lite version. If access to Priority Support and free upgrades are important to you then you might want to consider our Professional version.
