Windows DesignColleXTion

Tool collection for design works

This utility collection offers a voluminous tool palette to make design works with QuarkXPress more efficient.

<u>Containing:</u>

- Assassin: to delete pictures in a document or folder using a dialogue box. Thereby only specified picture formats can be deleted or only specific file names can be selected.
- Color usage: shows the colors a document uses with dot gain and the way of usage in a window.
- Color Change: shows a dialogue field, in which colors, that have been used in the document, can be searched and replaced. Color Change changes colors in text, pictures, background, frames and lines and specifies also how colors shall be used in the document and dot gains are changed.
- Exposé: establish a graphic catalogue (overview) of all graphics in a selected folder in the form of a QuarkXPress document with this XTension
- Partial Prints: allows the user to print only a specified part of a page or save as an EPS file.
- Picture Tools: With this XTension it is possible to "grey out" single or alternatively all pictures in a document and adapt picture frame to pictures. Furthermore pictures can be excluded from printing.
