

# WonderText

**Wondertext makes you possible to leave an entry to many raster operations**

Wondertext makes you possible to leave an entry to many raster operations in a comfortable way without leaving QuarkXPress. You can manipulate and combine up to 24 alpha channels and many more. WonderText provides you to generate and change many raster options. Further it provides contents of channel generation, copying, maskering, image loading and many more. You simply need to adjust only one parameter and can change and preview it.
