

Arabic XT

Create documents with QuarkXPress in arabic language

Arabic XT is the unique application in the desktop publishing market which allows users to easily create website, interactive/Flash ©, and print designs in Arabic, Kurdish, Farsi, Jawi, and many other right-to-left languages.

Using the award winning software ArabicXT in conjunction with QuarkXPress, anyone can learn to create superb bi-directional page layouts, producing top-quality professional Arabic and Latin publications, without the need for an Arabic operating system.

ArabicXT supports the following languages:

- Arabic
- Jawi
- Farsi
- Kurdish
- Hebrew

The languages can be used as well in print-, as in interactive- and web projects.

Next to the included high-quality basic font additional font collections are available [here...](#)

Features & Benefits

- Create eye-catching Arabic-language Web documents to export as HTML documents and post directly on a website.
- Publish with all Right-To-Left languages in the same document and text box.
- Full support of ArabicXT fonts as well as Macintosh Arabic system fonts.
- Copy and paste Arabic text to and from other Arabic Unicode software.
- Create Arabic searchable PDF files.
- Superb Arabic web-based and print-based designs.
- Synchronized Arabic text among different layout spaces.
- Efficient table management in a mixed Arabic-Latin page layout.
- Automatic vertical and horizontal positioning of vowels over characters .
- Flip document layouts for bilingual publications.
- Multiple Undos - Enjoy this feature to reverse one action or a series of actions including text and picture import, text linking style sheet edits and much more.
- Drop words over several lines at beginning of paragraphs.

- Automatic Kashida insertion using powerful Kashida algorithms.
- Mixing Arabic and Latin text.
- Import Unicode Arabic text from Macintosh or Windows word processors.
- Controllable Ligature selection.
