

CoCo MultiChannel

Color separation plug-in for Photoshop

As well as offering the capabilities of CoCo RGB/CMYK for color correction, CoCo Multi Channel allows you to work on any combination of any ink color separations, in full interactive view of what you are doing.

CoCo Multi Channel can be used to correct individual elements of PANTONE Hexachrome®, any other proprietary multi-color system or your own special color separations. This plug-in offers you the simplest spot color creation on the market.

NOTE:

We just listed this PlugIn for the sake of completeness.

You can place orders directly on the developer site:
