

ex AdBase2Q

Interface between AdBase and QuarkPublishingSystem®

ex AdBase2Q XT is an interface between AdBase Adsystem and QuarkPublishing System (QPS). An AdBase export file contains information about booked ads, i.e. size, page, path to the file. This information will be read by ex AdBase2Q XT and forwarded to the XTension **ex Plan2Page**. This XTension creates new QuarkXPress documents which already contain the ads and checks them into QPS.
