

ex AutoCheckInXML

Automatically check in of XML text files in QPS

ex AutoCheckInXML is a **QuarkCopyDesk** XTension, which checks in XML text files automatically into QuarkPublishingSystem (QPS). The file names keep the same in QPS. It is possible to set the QPS header fields publication, section, status and routed to while checking in the new articles. The XML files can either be deleted or moved during the process.

As soon as new XML files are dropped into the watched folder, ex AutoCheckInXML checks new articles into QPS.
