

ex DataLookup

Fill headerfields in QPS with data

The ex DataLookup XTension simplifies the work with QuarkPublishingSystem® (QPS) for Editorials and Layouter with filling the correct data in the headerfields while checking in articles or layouts. The headerfields has to be type "text". When leaving a headerfield with typing the tabulator button a list with the possible values opens and the user only has to choose the needed one. Therefor every headerfield can be configured in the way that it's depended on the content of another headerfield, which in turn was filled out by ex DataLookup. This data can come from an XML- or an ASCII-file or directly read out from an URL.

Beyond the ex DataLookup XTension gives information to the [ex Plan2Page XTension](#).

The screenshot shows the 'Check In Project' dialog box. It contains several input fields: 'Name' (SB_GAZ_HP_E_20080705_2C_V1 Ver.11 (Nur-Lesen)), 'Publication' (Gießener), 'Section' (Kreisredaktion), 'Status' (PDF erzeugt), and 'Route To' (No One). Below these is a 'Revision Comment' field with the text '11.07.2008 10:08 Uhr'. The 'File Header Info' section shows 'Unter-Ressort' (highlighted in red), 'Seite' (07), 'E-Tag' (05.07.2008), and 'Nr.' (155). The 'ex DataLookup' window is open, displaying a list of values for the 'Unter-Ressort' field: 'Kreis Gießen', 'Mittelhessen', and 'Pinnwand'. The 'OK' button is visible at the bottom right.

The screenshot shows the 'Check In Article' dialog box. It contains several input fields: 'Name' (GAZ_TK_20080505), 'Publication' (Gießener), and 'Section' (~system). The 'OK' button is visible at the bottom right.
