

ex Grids&Guides

Define guides and layout grids by an entered numeric position

ex Grids&Guides is an XTension which lets you define guides by an entered numeric position in your own selected colors. You can also freely define layout grids with the additional option to select if these grids/guides are to be used on all pages or only on selected ones (e.g. left/right side). These guides or grids can be saved. The last change can be reverted to. The working speed of QuarkXPress is not affected.

This XTension is also included in [ex Addy](#).
