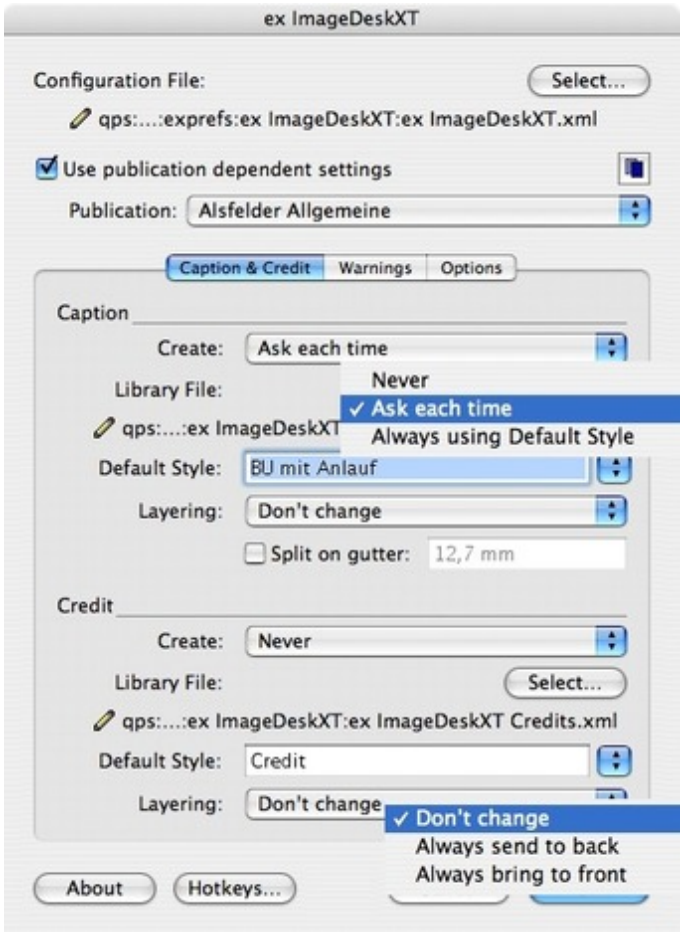
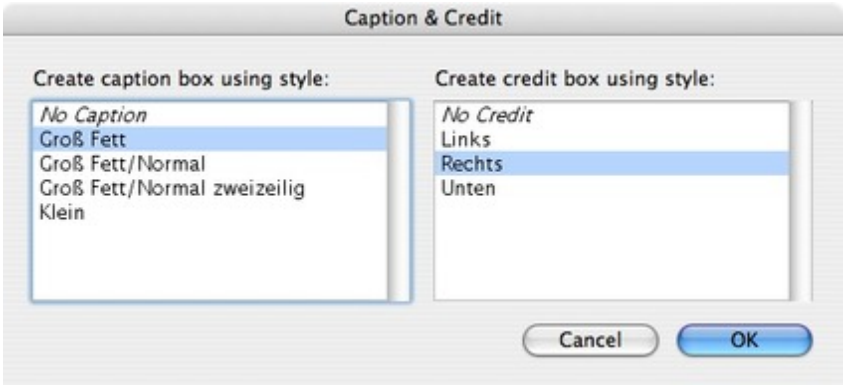
Caption & Byline

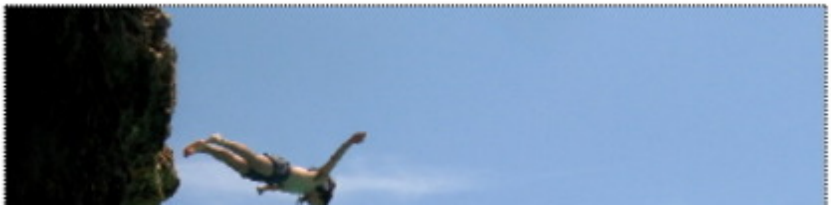
During the import of a picture a caption and a byline box can be automatically created and filled with appropriate data from the IPTC header. These boxes already contain a style sheet wich will be applied.



For every picture placement you can choose if and in wich style Caption & Byline should be shown. Therefore choose "Ask each time" in the preferences "Create caption/ credit" (c.f. above).



If frames for Caption & Byline are required, the pictures will be displayed like in the below shown examples. The position and the formatting can be set as required.



Example for Author/Photographer

Category

- XTension

Theme

- Colors/Images
- Printing/Imaging
- Utilities
