

ex StrikeThrough

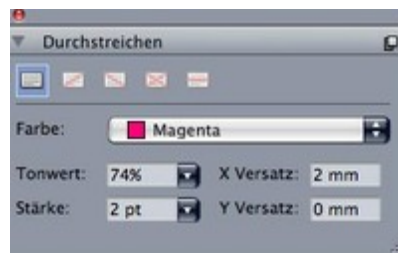

Different designs for strike through words and a row of words

The XTension ex StrikeThrough supplements the integrated strike through functions of QuarkXPress by different kinds of strike through designs.

The following strike through designs can be set:

- straight-line
- crossed
- below left to above right
- above left to below right

Additional the strike through can be moved horizontally and vertically. The strength and the tone value of the strike through can be set also.

The XTension is perfect for the price marking in catalogues:
