

# ex TranslationWorkflowWW

## PlugIn to connect ex TranslationFilter and WoodWing

This PlugIn makes ex TranslationFilter WoodWing-aware, allowing for tighter integration of translation workflows in a WoodWing environment and automation of translation tasks.

ex TranslationWorkflowWW is basically a PlugIn for InDesign-Server or InDesign (desktop application) and a client for the **SmartTranslation Solution**. It requires the "ex TranslationFilter Plug-In" and makes this Plug-In "article-aware".

**ex TranslationWorkflowWW is designed for two different workflows:**

- **Edition-based Workflow:** Layouts contain one edition per language. When a layout is prepared for translation, all articles are duplicated from the source language into their respective target language editions. Thus, one layout contains articles for each language.

Name	Status	Weiterleiten...	Verwendet von	Platziert auf...
GENERELL_Edition_gb1	Entwurf			
GENERELL_Artikel_gb1-England	Translation file created		GENERELL_Edits	
GENERELL_Artikel_gb1	Rohtext		GENERELL_Edits	

- **Metadata-based Workflow:** A layout is created in its source language. Source language, target language, priority etc. are configured as custom attributes in WoodWing and applied to the layout and its articles. When the layout is exported for translation, it is duplicated in its entirety for each target language and optionally placed in a dossier.

Name	Status	Weiterleiten...	Verwendet von	Platziert auf...
BeispielLayout_metadata_gb	Dossiers			
BeispielLayout_metadata_gb-it_CH	translation file created			
Artikel1-it_CH	Translation file created		BeispielLayout_r	
BeispielLayout_metadata_gb	Entwurf			
Artikel1	Rohtext		BeispielLayout_r	
Artikel1-it_CH.xlf	needs translation			
Artikel1-it_CH	Translation file created		BeispielLayout_r	

Translation of articles can then continue either locally or by sending exported XLIFF files to translators.
