

Server preferences

The general attributes of the ex WebEdit server will be stored in the preferences of the Quark server extension. One setting is the IP address.

The image shows a dialog box titled "ex WebEdit" with a close button (X) in the top right corner. The dialog contains the following settings:

- Server (and Port):** A text input field containing the IP address "192.168.203.80.2222".
- Modify text:** Three radio button options:
 - in all text boxes
 - in named text boxes
 - in Articles
- Timeout for Session:** A text input field containing "30" followed by the label "min".
- When logging out:** Two radio button options:
 - Check In all Assets
 - Undo CheckOut for all Assets

At the bottom of the dialog, there are three buttons: "About", "Cancel", and "OK".
