

ex WireXTension

The ex WireXTension allows the user to import newswires into a QuarkXPress-document or a QuarkCopyDesk-article by Drag&Drop without to change the application.

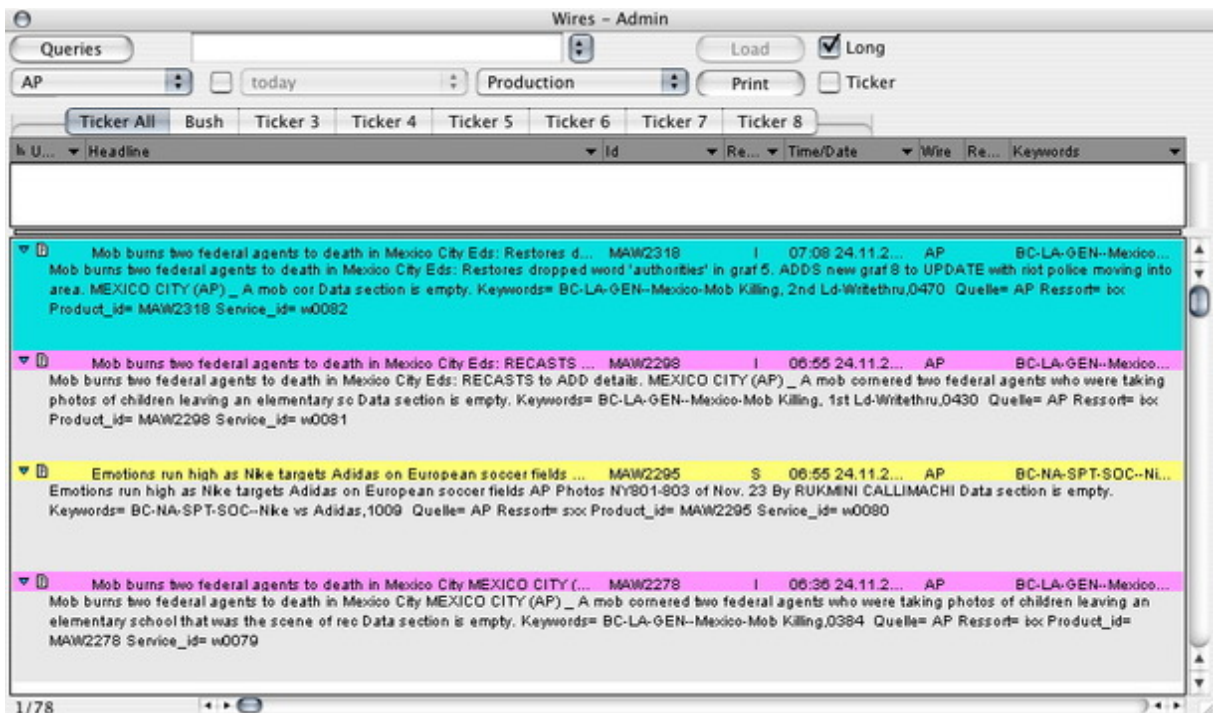

The wires palette shows the newswires in QuarkCopyDesk oder QuarkXPress.

Remark: ex WireXTension is also integrated in our solution ex ContentBrowser- a XTension for issue and ressourceplanning directly in QuarkXPress over aXPress palette

With the help of queries the wires can be filtered. With the "long" view, a preview of the wires shows the first lines of the text. A double click opens a window and allows to read the complete text. The ticker option allows the user to receive and read new wires immediately.

The wires palette shows the headline of the newswire, in the "long" view the first lines of the text are shown.

A double click opens the newswire and shows the complete text in a new window. The text can be imported

into the document via Copy and Paste.

The screenshot shows a browser window titled "dpa/KORR-Ausland Golf US-PGA-Tour /". It has three tabs: "Edit Wire", "HTML View", and "Comment". The "Title" field contains the text: "(Zusammenfassung 1215) Tiger Woods am Kreuzband operiert: »Ich komme 2008 gesund zurück« Von Rainer Fülischer, dpa =". The main content area displays a news article in German, starting with "(Zusammenfassung 1215) Tiger Woods am Kreuzband operiert: »Ich komme 2008 gesund zurück« Von Rainer Fülischer, dpa =". The article describes Tiger Woods' knee surgery and his return to the golf tour.

If a newswire has been dragged into a QPS article, QPS headers of this article will be read and shown in "Usage".

The screenshot shows the same browser window with the "Usage" tab selected. The "Comment" field is empty. Below it, the "Last usage:" section displays the following information:

Alsfelder Allgemeine	Admin
Sport	13:39 01.07.2008
EU-Championship	

Below the table, there is a checkbox labeled "Wire may be used again" which is currently unchecked. At the bottom, there are two buttons: "Set" and "Cancel".

The banner palette shows the latest newswires.
