

Object details

Object means in this context geometries of articles with textframes, pictureframes and pages. All objects have geometric details (the position on page), which can be used for creating ePapers.

The dialog box is titled "XML assignments". It contains two main sections: "XML Target" and "Layout Source".

XML Target section:

- Type: Element
- Name: Name of Tag
- Occurrence: 1
- Format: <#> ☐ CDATA Section

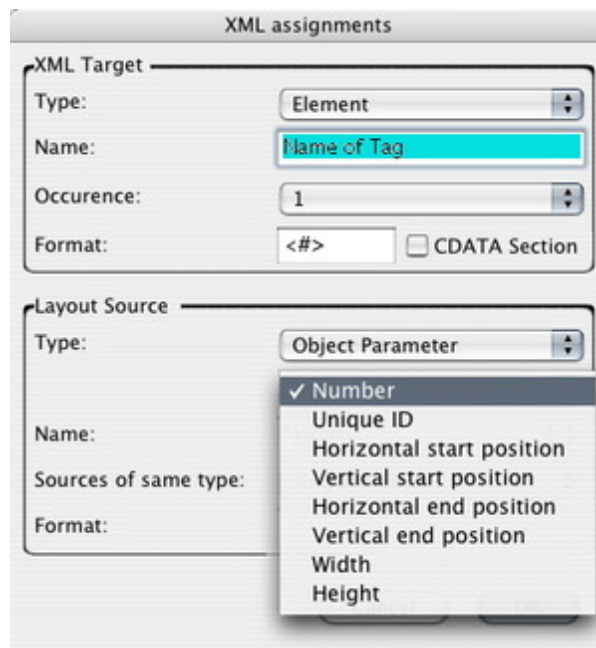

Layout Source section:

- Type: Object
- Name: (empty)
- Sources of same type: (empty)
- Format: (empty)

A dropdown menu is open for the "Type" field in the "Layout Source" section, showing the following options:

- ✓ Article
- Page
- Text box
- Image (ex BoxTools)

At the bottom of the dialog are "Cancel" and "OK" buttons.

The dialog box is titled "XML assignments". It contains two main sections: "XML Target" and "Layout Source".

XML Target section:

- Type: Element
- Name: Name of Tag
- Occurrence: 1
- Format: <#> ☐ CDATA Section

Layout Source section:

- Type: Object Parameter
- Name: (empty)
- Sources of same type: (empty)
- Format: (empty)

A dropdown menu is open for the "Type" field in the "Layout Source" section, showing the following options:
