

# File-O-Mat

create thumbnail listings of your QuarkXPress documents

File-O-Mat allows you to catalog and create thumbnails or text listings of QuarkXPress documents. This comprehensive document cataloging and retrieval application will finally bring order to your archived publications.

Features include:

- Preview your files at zoom levels of 12.5% to 800%
- Search by keywords derived from file descriptions
- Print catalogs, text lists, thumbnails, and/or actual images
- Retrieve files by dragging the thumbnail or text listing into the Finder
- Restrict available features on multi-user systems
