

Image Adjuster

color correct TIFF-pictures in XPress

ImageAdjuster gives you the power to correct the color of your images inside QuarkXPress. Whether you are an expert in color or a novice user, ImageAdjuster easily allows you to change the color of your images, giving you greater control over the color in your document. Effort and time will be saved by using the adjustment pre-sets that come with ImageAdjuster or by creating your own settings, which can be saved and reapplied to other images.

Corrections include:

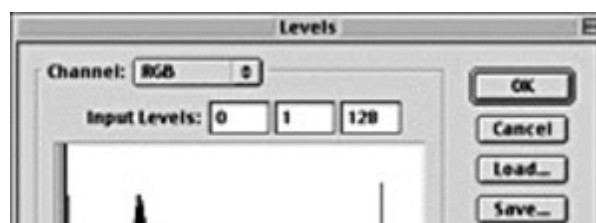

- Curves
- Color Balance
- Brightness/Contrast
- Hue/Saturation
- Selective Color
- Channel Mixer
- Invert
- Threshold
- Posterize
- Color Fill

Utilizing the advanced TIFF file format ImageAdjuster images can be opened and edited with Adobe Photoshop 6.0 or greater.

ImageAdjuster supports Grayscale, RGB and CMYK images.

The Curves dialog box lets you correct the tonal range by mapping input/output values for highlight, midtone, and shadow values. The Levels dialog box lets you correct the tonal range and color balance of an image.

The Hue/Saturation adjustment enables you to adjust the hue, saturation, and lightness of the entire image or individual colors in an image. Color Balance adjustments will change the overall color mixture in your image.
