

PageXTractor

Entire XPress files can be saved as PICT or text files

With the PageXTractor entire XPress files can be saved as PICT or text files. These files can now be archived in an open digital system, supporting PNOT-standards. The PICT files can either be viewed as previews in actual size or thumbnails without requiring Quark XPress. Simultaneously, text from a QuarkXPress document can be exported, e.g. full text searching.
